**Dominance Test Worksheet:**

Number of Dominant Species  
 That Are OBL, FACW, or FAC: 5 (A)  
 Total Number of Dominant  
 Species Across All Strata: 8 (B)  
 Percent of Dominant Species  
 That Are OBL, FACW, or FAC: 62.5% (A/B)

**Prevalence Index Worksheet:**

OBL species 0 x 1 0  
 FACW species 80 x 2 160  
 FAC species 20 x 3 60  
 FACU species 70 x 4 280  
 UPL species 0 x 5 0  
 Column Totals 170 (A) 500 (B)  
 Prevalence Index = B/A = 2.94

**Hydrophytic Vegetation Indicators:**

- 1- Rapid Test For Hydrophytic Vegetation
- X 2- Dominance Test is > 50%
- X 3- Prevalence Index is =< 3.0
- 4- Morphological Adaptations
- 5- Problematic Hydrophytic Vegetation

**Definitions of Vegetation Strata:**

Tree- Woody plants 3 in. (7.6cm) or more in diameter at breast height (DBH), regardless of height.

Sapling/Shrub- Woody plants less than 3 in. DBH and greater than or equal to 3.28ft (1m) tall.

Herb- All herbaceous (non-woody) plants, regardless of size, and woody plants less than 3.28ft tall.

Woody Vines- All woody vines greater than 3.28ft in height.

Hydrophytic  
 Vegetation  
 Present? Yes X No       

Remarks: (Include photo numbers here or on a separate sheet.)

**Definitions of Vegetation Strata:**

Tree- Woody plants 3 in. (7.6cm) or more in diameter at breast height (DBH), regardless of height.

Sapling/Shrub- Woody plants less than 3 in. DBH and greater than or equal to 3.28ft (1m) tall.

Herb- All herbaceous (non-woody) plants, regardless of size, and woody plants less than 3.28ft tall.

Woody Vines- All woody vines greater than 3.28ft in height.

**CIDER SOLAR FARM  
WETLAND AND STREAM DELINEATION REPORT AND FUNCTION AND VALUE ASSESSMENT**

Appendix G ORES Approved jurisdictional Jurisdiction

**Appendix G ORES APPROVED JURISDICTIONAL  
JURISDICTION**

**Wetlands Jurisdictional Determination  
April 2, 2021**

Pursuant to § 900-1.3(e)(2), Hecate Energy Cider Solar LLC provided a draft wetland delineation report entitled “Wetland and Stream Delineation Report and Function and Value Assessment,” dated November 2020, as well as shapefiles dated submitted March 2021 for Hecate Energy Cider Solar Farm, Genesee County, New York.

Pursuant to § 900-1.3(e)(4), the Office of Renewable Energy Siting (the Office or ORES), in consultation with the New York State Department of Environmental Conservation (NYSDEC), hereby provides in Attachments A and B specific jurisdictional determinations for state regulated wetlands identified in the draft wetland delineation report and shapefiles. The information provided in Attachment A, with the three minor changes noted, together with Attachment B, will be necessary for developing Exhibit 14 (§900-2.15) in support of an application to the Office for a major renewable energy facility.

Please note that this determination only applies to major renewable energy facilities covered by Section 94-c of New York Executive Law and 19 NYCRR Part 900. This determination does not cover other projects, nor does it cover determinations under other applicable federal, state, or local jurisdictions, such as the Army Corps of Engineer’s regulatory program under Section 404 of the Clean Water Act. Please contact those entities regarding their potential regulatory jurisdiction.

This determination is valid for a period of five years from the date of this letter. After five years, determinations and delineations will be considered expired and subject to change until a new determination or delineation is conducted and ORES extends this determination or issues a new jurisdictional determination.

CC: NYSDEC
